Carbometum

Method

Radiesthetic Study: examination of concrete samples V21 and V22 as well as examinations in the Objekt Hochstrasser in Unterendingen on 1.9.04.

The examination was made using a technique called "Griffängen-Technick" (grip length) based on Reinhard Schneider's technique.

Results

Samples from 16.12.2003 PC 375 cylinder d=30 mm H=47 mm	Concrete sample V21 with 0% additive	Concrete sample V22 with 1% additive Carbometum®
Symptomatic main "Griffänge" Lecher antenna value $\lambda/4$ in cm Corresponds with a tone ofHz Polarisation: right (ri) or left (le) Intensity: 1=strong 7=weak	4.3 cm / 2000 Hz / le / 1 8.6 cm / 1000 Hz / le / <1	5.7 cm / 1508.77 Hz / ri / 2-3 5.2 cm / 1653.85 Hz / ri / 4
Meaning (information) of the vibration	4.3 medicine: Carcinoma and heart attack Geology: fault "faulty quartz"	5.7 art of building: celtic settlements 5.2 geomancy: ley lines corresponding to Bach flower essence 14 Heather
Further "Griffänge" (grip lengths) (GL)	No dextrorotatory GL 1.6 cm / 5375 Hz / le / 3 1.8 cm / 4477.78 Hz / le / 4 3.8 cm / 2263.16 Hz / le / 3 4.1 cm / 2097.56 Hz / le / 3	9.7 cm / 886.60 Hz / ri / 6 14.4 cm / 597.22 Hz / ri / 6 8.6 cm / 1000 Hz / le / 7
Significance of the further "Griffänge" grip lengths	1.6 cm gout/ rheumatism / suppurative focus 1.8 cm depression 3.8 cm heart neurosis 4.1 cm itchiness/vegetative nervous system / cancer	9.7 cm regeneration 14.4 cm like Bach flower rescueremedy 8.6 cm fault (strongly reduced)

Summary

This information (vibration) demonstrates a clear improvement in quality.

The frequencies (pattern) of traditional concrete correlates with hostile degenerative conditions (counter-clockwise polarisation). Concrete containing Carbometum® does not have the aforementioned negative attributes any more, instead demonstrating qualities that are considered positive to healthy living.

In the space surrounded by concrete (EFH Hochstrasser), in cement floors and ceilings with Carbometum® added, the radiation field of the global grid according to Dr. Hartmann is no longer discernible. The values on the Bovis-scale are above standard. This means that such a place contains more energy, light and warmth and can offer a more relaxing and comfortable living environment.

It is my opinion the use of Carbometum® significantly contributes to the production of an ecologically sustainable concrete.
